## TELEMEDICINE

Specific medical devices and software for the **MONITORING & PREVENTION** of metabolic disorders, which allow a continuous two way connection with the medical facility.

All advanced **HEALTH CARE PROFESSIONALS** need to **SHARE TIMELY INFORMATIONS** to reach effective diagnoses.

**BSI telemedicine** tools support the **EXCHANGE OF DIAGNOSTIC DATA** starting from mobile devices.

## ■ **SMART MANAGEMENT**

Our safe, GDPR compliant cloud infrastructure enables flexible management of diaries, graphs and statistics. Effortlessly share your relevant data with your doctor or caregiver.

- Our MOBILE APP'S are available in the most common stores.

- This App provides a full featured toolkit for the correct control of chronic metabolic diseases such as diabetes and its complications.

### **USER FRIENDLY INTERFACE**

intuitive and easy layout

---

### **CONTINUOUS DATA LOGGING**

the diary safely collects all results on your mobile device

---

### **INTERACTIVE MONITORING**

your doctor may monitor and consequently adjust your parameters

---

### **ALERTS**
